

Cars

Category : themes for sale

Published by [Webmaster](#) on 2008/2/13

This is a free theme

[download](#)

I designed the Cars Theme primarily for a business or online store site, though it could be used for a gaming site or personal site also. It is 3 columns wide and automatically adjusts to different screen resolutions.

Live Demo: Choose 'Cars from the Theme Selector on the main page, to see how the Theme will look after you install it straight out of the box. The default theme on my site is the Cielo Theme but has my own logo and other personal additions. Please read on for more information and Screenshots.
